

BVSP – Business Requirements Blueprint (BRB)

Version 1.0

Document Status: Draft for Approval

Project Name: Bhanap Vaiyaktika Seva Portal (BVSP)

Tagline: *Your Digital Spiritual Companion*

Sponsor: Dr. Vishweshwar Kulkarni Foundation (DVKF)

Technology Partner: V K Computer Services (VKCS)

1. Executive Summary

The **Bhanap Vaiyaktika Seva Portal (BVSP)** is a digital platform designed to support the spiritual practices of the Chitrapur Saraswat (Bhanap) community by providing organized access to authentic spiritual resources, Seva Programmes, Sankalpa management, daily Sadhana logging, and personal progress tracking.

BVSP is not intended to replace traditional spiritual practices or institutions. Instead, it serves as a digital companion that helps Sadhakas maintain discipline, continuity, and engagement in their personal spiritual journey.

Version 1.0 will launch with **Goregaon Sabha** as the pilot Sabha while allowing the wider Bhanap community to explore the portal as guests. The platform is designed from the outset to support multiple Sabhas and future Seva Programmes without requiring changes to the software architecture.

2. Vision Statement

To create a trusted digital spiritual companion that inspires, guides, and supports every Bhanap Sadhaka in maintaining disciplined personal spiritual practice while preserving and promoting the rich spiritual heritage of the Chitrapur Saraswat community.

3. Mission Statement

To leverage modern technology in a respectful and responsible manner to:

- Organize authentic spiritual resources.
 - Encourage participation in Seva Programmes.
 - Assist Sadhakas in maintaining personal discipline.
 - Enable Sabhas to coordinate spiritual initiatives more effectively.
 - Preserve the community's spiritual heritage for future generations.
-

4. Product Philosophy

BVSP is built on five guiding principles:

1. Spirituality First

Technology must always remain secondary to Sadhana.

2. Simplicity

Every feature should be intuitive, especially for senior citizens.

3. Authenticity

The portal should organize and reference authentic resources while respecting copyrights and acknowledging original sources.

4. Accessibility

Every visitor should receive spiritual value before being asked to register or log in.

5. Scalability

The platform should support future Sabhas, Seva Programmes, and initiatives without requiring software redesign.

5. Objectives

The primary objectives of BVSP Version 1.0 are:

- Provide a central platform for spiritual programmes.
 - Make authentic spiritual resources easily accessible.
 - Digitally manage Sankalpa and daily Sadhana for participating Sadhakas.
 - Enable coordinators to monitor participation at the Sabha level.
 - Build a reusable platform for future community initiatives.
-

6. Target Users

Public Visitors

Anyone interested in exploring the portal.

Capabilities:

- View spiritual content.
- Explore programmes.
- Access public resources.

No registration required.

Registered Sadhakas

Initially limited to approved members of **Goregaon Sabha**.

Capabilities:

- Login using Mobile Number and 4-digit PIN.
 - Participate in Seva Programmes.
 - Record daily Sadhana.
 - Track personal progress.
-

Sabha Coordinators

Responsible for managing Goregaon Sabha participation.

Capabilities:

- Approve registrations.
- View reports.

- Support participants.
-

Super Administrator

Responsible for overall platform management.

Capabilities:

- Manage Sabhas.
 - Create programmes.
 - Manage portal settings.
 - Oversee resources and users.
-

7. Version 1 Scope

Public Features

- Today's Darshan
 - Today's Subhashitam
 - Today's Inspiration
 - Active Seva Programmes
 - Programme Details
 - Resource Library
 - Important Dates
 - FAQ
 - About BVSP
-

Registered Sadhaka Features

- Registration
 - Mobile + PIN Login
 - Sankalpa
 - Daily Sadhana Logger
 - Personal Progress
 - Summary
-

Coordinator Features

- Registration Approval
 - Sabha Reports
 - PIN Reset
 - Export Reports
-

Super Admin Features

- Sabha Management
 - Programme Management
 - Resource Management
 - User Management
 - Portal Settings
-

8. Version 1 Business Rules

- Public content is accessible without login.
 - Only approved Goregaon Sabha members may register in Version 1.
 - Sankalpa can be submitted only once per programme unless unlocked by an administrator.
 - Daily Sadhana entries can be edited only on the same day (subject to final policy).
 - Progress reports display only the logged-in Sadhaka's own data.
 - Coordinators can view only their Sabha's reports.
 - Super Administrator has access to all Sabhas and portal settings.
-

9. Future Roadmap

Future releases may include:

- Additional Sabhas
- Multilingual support
- Certificate generation
- Push notifications
- Offline support
- Advanced analytics
- Event registrations

- Donation integration

These features are explicitly outside the scope of Version 1.0.

10. Success Criteria

Version 1.0 will be considered successful if:

- Public users can easily explore spiritual resources and programmes.
 - Goregaon Sabha Sadhakas can successfully register, log in, take Sankalpa, record daily Sadhana, and view their progress.
 - Coordinators can manage registrations and generate Sabha reports.
 - The platform remains simple, reliable, and welcoming for users of all ages.
-

✦ Business Requirement Freeze (Version 1.0)

Before we move to the Technical Implementation Guide, I recommend freezing these core business decisions:

- **Pilot Sabha:** Goregaon Sabha only.
- **Guest Access:** Entire Bhanap community can browse without login.
- **Authentication:** Mobile Number + 4-digit PIN.
- **Primary Programmes:** Parijnanlahari Mahotsava and Chaturmas Sadhana.
- **Architecture:** Multi-Sabha and multi-programme ready from day one.
- **Guiding Principle:** "Public first, personal progress after login."

If you approve this Business Requirements Blueprint, we will **freeze it as Version 1.0** and immediately move to **Step 2: BVSP Technical Implementation Guide (TIG)**. This technical guide will become the main reference for Google AI Studio and future developers.
